MY PROFILE

I am a Data Engineer specialized in Geospatial Information Systems(GIS), with extensive experience in developing optimized ETL (Extract, Transform, Load) processes and in creating tools for generating data for Machine Learning. As a Data Engineer, I am committed to refining data pipelines, effectively transforming raw data into essential resources for various applications.

I have a strong proficiency in backend development, which I consider my area of expertise.

EXPERIENCE

Geospatial data engineer

Developmentseed

2019 - current

- Developed data pipelines for machine learning applications.
- Managed ETL processes for geospatial data.
- Created applications/plugins for data processing.
- Contributed to OpenStreetMap applications and projects.
- Speaker at State of the Map and WikiConference.

Full stack developer

Freelance

2018 - current

- Developed and maintained web and mobile applications.
- Deployed and automated governmental applications efficiently.

TECHNICAL SKILLS

Python

GDAL

AWS / GCP

Django

React / Native

OpenStreetMap

Docker

Javascript

PostgreSQL

EXPERTISE

Backend developer

Geographic information system (GIS)

Extract, transform, and load (ETL)
